- Ajax, Asp.Net ,MVC, React, Bootstrap, Node JS.
- Web Development.
- Software Development.
- Git, GitHub
- Restful API
- Teamwork, Event Management, Leadership

PROJECTS:

- Update. Daily – Blogging Platform

Built a dynamic blogging site with categorized content and a JSON-based source listing system. Designed a responsive UI using CSS Grid & Flexbox for clean content presentation. Implemented organized page structures for better readability and navigation.

- MERN Authentication System

Developed user registration and login with JWT-based authentication. Secured routes, encrypted passwords, and structured RESTful API endpoints. Designed a minimal and functional React UI for smooth user flow.

- Portfolio Website

Created a responsive personal portfolio using HTML, CSS (Tailwind), and JavaScript. Showcased projects, skills, and contact information in a clean layout. Focused on mobile responsiveness and simple UI/UX.

- CRUD Task Manager (Full-Stack)

Built a full-stack task manager with task creation, editing, deletion, and status updates. Integrated React frontend with Node.js, Express.js, and MongoDB backend. Ensured smooth task operations through organized REST API design.
